

Vegetation Protection Barricades (VPB)

In order to ensure vegetation slated for preservation and /or transplant is protected, VPBs shall be installed prior to the start of any on-site land development activities/clearing. A Vegetation Barricade Permit shall be required prior to VPB installation.

In addition to the standard permit application form, the following documents shall be submitted to the Building Division for a Vegetation Barricade Permit application:

- 3 (sets) copies of the approved Disposition Chart and the applicable plan(s), such as, Site Plan and/or Subdivision Plan, and/or Landscaping or Alternative Landscaping Plan depicting the proposed location of the barricades; and,
- 3 (sets) copies of the description of, or product specifications for the type of durable material that will serve as the barricades, as approved by Environmental Resource Management (ERM). Include the description of the maintenance plan for those trees to slated to be relocated.

The application will be routed to Zoning Landscape Staff for review in conjunction with ERM Staff. The Barricade Permit application and preliminary inspection shall occur prior to any land development activity / clearing. After the permit has been issued and the barricades have been installed the applicant shall schedule a Final Inspection for Landscape Staff. Failure to comply with these requirements will result in a Stop Work Order being placed on the site and potential fines assessed.
