# PALM BEACH COUNTY BOARD OF COUNTY COMMISSIONERS 

WORKSHOP SUMMARY

| Meeting Date: | February 25, 2020 |
| :--- | :--- |
| Department: | County Administration |

## I. EXECUTIVE BRIEF

Title: Evergreen Compensation Study - Overview of Study Findings

Summary: With the Board's acknowledgement, staff engaged Evergreen Solutions, LLC in the spring of 2018 to conduct an in-depth classification and compensation study for the CWA bargaining, Palm Tran non-bargaining, and general employees of the Board of County Commissioners. The study was necessary due to growing challenges in the recruitment of employees to fill vacancies in a number of departments across the County as the economy has improved over the past several years. The purpose of the study was to review and compare the local employment market to determine the competitiveness of the County's salary ranges, obtain valuable employee feedback relating to their perception of the County as an employer, and to review each and every job classification to ensure it reflects the actual work being performed and that the associated class structure is appropriate.

Staff and the Consultants will provide an overview of the study's key findings and associated costs, and seek Board direction on a staff-recommended schedule for implementation. Countywide (DO)

Background and Policy Issues: The Board of County Commissioners has not conducted an in-depth classification and compensation of this scope in over 20 years. Staff engaged the services of Evergreen, LLC in 2018. The Consultants conducted a series of employee orientation sessions, employee focus groups, and interviews with County employees. Job Assessment Tools were completed by employees, reviewed by supervisors, and also by the Human Resources Department. All existing job descriptions were reviewed and updated. The local employment market was surveyed and recommendations have been made and included in the report. The consultants will return to the County, following Board review and direction, to hold final meetings with County employees to disseminate the findings of the report and train key staff in Human Resources on the upkeep of the classification system.

## Classification and Compensation Study Palm Beach County

 Presentation of Results
## 

Presented by:

Evergreen Solutions, LLC

February 25, 2020

## Overview

- Study Goals
- Project Phases
- Major Findings
- Recommendations
- Next Steps

## Study Goals

- Review current classification and compensation system to ensure internal equity
- Survey peer organizations to ensure external equity
- Produce recommendations to provide the organization with a classification and compensation system that is equitable, both internally and externally

## Project Phases

## Current System Findings

- Strength:
$>$ The County possesses well designed, well maintained compensation and classification structures
$>$ Titles are generally accurate and reflective of best practice.
- Weakness:
$>$ The overwhelming majority of County employees have salaries in the first quartile of the range
$>$ New living wage initiative has potential to cause further compression
$>$ Some areas are in need of classification updates

## Market Findings

- Salary survey resulted in 21 responses.
- All responses are adjusted for cost of living differentials.
- A total of 150 jobs were benchmarked.
- The County was found to be, on average, $\mathbf{0 . 2}$ percent below market at minimum, 1.9 percent above market at midpoint, and 3.1 percent ahead of market at maximum.

Respondent Organizations Brevard County<br>Broward County Collier County Hillsborough County Indian River County Lee County Martin County<br>Miami-Dade County Monroe County Palm Beach Sheriff Pinellas County Sarasota County City of Boca Raton City of Coral Springs City of Fort Lauderdale<br>City of Jacksonville<br>City of Jupiter<br>City of Miami<br>City of Palm Beach Gardens<br>City of Wellington<br>City of West Palm Beach

## Key Recommendations

1. Adopt a new classification series for the administrative support and directors classifications.
2. Update current classification specifications and corresponding FLSA status to align with the recommended reclassifications and be reflective of the employee provided JAT information.
3. Adjust the overall compensation structure to accommodate the new living wage initiative; additionally, grade assignments for small number of classifications found to require adjustment.
4. Adopt implementation methodology for the adjusted compensation structure.

## Implementation Options

- Variety of options for instituting the adjusted compensation structure
- Bring to Minimum
- Class Parity
- Range Placement
- Hybrid Parity (Recommended)

## Implementation

- Evergreen recommends the County adopt a Hybrid Parity Approach to realign employees salaries.
- Evergreen further recommends the County adopt this methodology with a cap at the midpoint of the range, and explore implementing this over a threeyear period.
- The one year cost to implement via this method is estimated to be $\$ 22.5$ million impacting 3,315 employees.
- A three year phased implementation, assuming an additional $3 \%$ adjustment each year, would total an estimated $\$ 37.5$ million.

## Thank you

Dr. Jeffrey Ling, President Evergreen Solutions, LLC<br>2878 Remington Green Circle<br>Tallahassee, Florida 32308<br>850.383.0111 ph<br>850.383.1511 fax<br>www.ConsultEvergreen.com

## Executive Summary

With the Board's acknowledgement, the County Administrator engaged Evergreen Solutions, LLC to conduct an in-depth classification and compensation study for the CWA bargaining, Palm Tran nonbargaining, and general employees of the Board of County Commissioners. The study was necessary due to growing challenges in the recruitment of employees to fill vacancies in a number of departments across the County. A study of this magnitude has not been conducted in decades, and although it has taken a considerable amount of time to complete, it is now in its final draft phase. The study contains a number of recommendations; some of which have been implemented with the FY2020 budget, and some of which will require Board approval for implementation over a multi-year period of time.

The purpose of the study was to review and compare the local employment market to determine the competitiveness of the County's salary ranges, obtain valuable employee feedback relating to their perception of the County as an employer, and to review each job classification to ensure it reflects the actual work being performed and that the associated class structure is appropriate.

In general, employees view the County as a good, stable place to work. They cite the County's good reputation, co-worker relationships, benefits plan, work/life balance opportunities, and opportunities for advancement among the reasons they value the County as an employer. Employees also suggested areas of improvement, including more competitive pay, pay considerations for the evolution of their jobs over time, the need for consistency in employee evaluations, and compression within pay grades. Overall, employees expressed that they enjoy their jobs and believe they are performing worthwhile work.

## Notable Findings:

- The County's compensation structure is generally at the market rate or slightly above with a few exceptions within the margin of error.
- The County's pay range spread (recommended to be between 50-70 percent from the minimum figure to the maximum) is very consistent at $64 \%$ for all general pay grades within the County.
- 3,272 employees are compensated below their pay grade midpoint - which is $80.2 \%$ of all employees (excluding Fire Rescue and Palm Tran Bus Operators), with $59.5 \%$ falling within the first quartile of the pay grade and $15 \%$ of the workforce making the minimum salary for their pay grade. This is an indicator of a high turnover and a relatively newer workforce, following a large number of retirements over recent years. This was also impacted by multiple years following the "great recession" that did not include annual raises for staff.
- The County's average tenure is 12.1 years, which exceeds the national average of 11 years.
- The study's findings do suggest the County is moving employees through their pay ranges in an equitable manner in most cases.
- With regard to compression, the overall ratio between direct reports and their supervisor salaries County-wide is approximately 0.7 indicating the County is doing well in this regard overall. However, there are 374 supervisor/employee salaries within $5 \%$ of each other, some of which include employees making more than their supervisors.

## Study Compensation Recommendations Already Incorporated in the BCC FY2020 Budget:

- Adjust overall compensation structure by 3\% (including minimum and maximum levels of the PG).
- Implement a living wage floor of $\$ 15 /$ hour for all permanent/full time County employees (with the exception of Palm Tran bargaining employees, currently bargaining their expiring contract).

## Study Compensation Recommendations for subsequent FYs:

- Recommended Option - "Hybrid Parity - Capped at Midpoint."
- Gives employees $100 \%$ credit for all class years accumulated and $50 \%$ credit for the additional tenure years (beyond the class years already included)
- Total cost to implement for 3,315 impacted employees: estimated at a salary cost of $\$ 22.5 \mathrm{M}$, which would occur over a multi-year period.

## Study Classification Recommendations for Consideration:

- Adopt a new classification series for the administrative support classifications, reducing unique and dated titles from 23 to 8.
- Adopt a new classification series for director classifications. This would impact 126 unique classifications, and serves to differentiate between those positions responsible for managing programs, divisions, and whole departments. This would not change the titles or pay grades of current employees classified as Directors.
- Develop a strategy to address individual positions that are significantly below their market rate, pursuant to the report.
- Develop a strategy to address compression among the small percentage of employees within $5 \%$ or at a salary that is less than their subordinate staff, pursuant to the report.

## Outstanding Items:

- Evergreen has provided updated job descriptions to reflect the most current work being performed in the role. The edits are under HR and County Attorney staff review.
- Evergreen will be providing a recommendation on the Fair Labor Standards Act (FLSA) status of each classification to ensure full compliance.
- Evergreen will return to the County to facilitate meetings with employees relating to the dissemination of the study, and conduct training with HR staff on the "JAT" system for continued administration of the compensation plan.

## Classification and Compensation Study for Palm Beach County, FL

## FINAL REPORT

Evergreen Solutions, LLC
February 20, 2020

## Chapter 1 - Introduction

### 1.1 INTRODUCTION

Evergreen Solutions, LLC (Evergreen) was retained by Palm Beach County, FL (the County) to conduct a Compensation and Classification Study for all employees. This analysis provides the County's elected officials and management team invaluable information related to their employee demographics, opinions, market data, as well as internal and external equity.

Internal equity relates to the fairness of an organization's compensation practices among its current employees. Specifically, by reviewing the skills, capabilities, and duties of each position, it can be determined whether similar positions are being compensated in a similar manner within an organization. External equity relates to the differences between how an organization's classifications are valued and the compensation available in the marketplace for the same skills, capabilities, and duties. This component of the study aims to address how the County is positioned in the market relative to other organizations with similar positions and to develop recommendations that allow the County to recruit and retain quality employees. The classification component of this study aims to resolve any inconsistencies related to job requirements and ensures that jobs are appropriately aligned with the work performed.

### 1.2 STUDY METHODOLOGY

Evergreen combines qualitative with quantitative data analysis to produce recommendations that maximize the fairness and competitiveness of an organization's compensation structure and practices. Project activities included:

- Conducting a project kick-off meeting;
- Presenting orientation sessions to employees;
- Facilitating focus group sessions with County employees;
- Conducting an external market salary survey;
- Developing recommendations for compensation management;
- Revising classification descriptions based on employee JAT feedback;
- Developing detailed implementation plans;
- Creating draft and final reports; and
- Conducting training sessions with human resources staff in the methodology used to systematically assess job classifications.

## Kickoff Meeting

The kickoff meeting provided an opportunity to discuss the history of the County, finalize the work plan, and begin the data collection process. Data collection included the gathering of relevant background material including: existing pay plans, organization charts, policies, procedures, training materials, job descriptions, and other pertinent material.

## Employee Outreach

Through the orientation sessions, Evergreen associates briefed County employees on the purpose and major processes of the study. This process addressed employee questions in an effort to resolve misconceptions about the study and related tasks.

In addition, employees participated in focus group sessions designed to gather input from their varied perspectives as to the strengths and weaknesses of the current system. Feedback received from employees in this context was helpful in highlighting aspects of the compensation and classification structures which needed particular attention and consideration. This information provided some basic perceptional background, as well as a starting point for the research process.

## Job Assessment Tool ${ }^{\circledR}$ (JAT) Classification Analysis

Employees were asked to complete individual JAT surveys, where they shared information pertaining to their work in their own words. These JATs were analyzed and compared to the current classification descriptions, and classifications were individually scored based on employee responses to five compensable factor questions. Each of the compensable factorsLeadership, Working Conditions, Complexity, Decision Making, and Relationships-were given weighted values based on employee responses, resulting in a point factor score for each classification. The rank order of classes by JAT scores was used to develop a rank order of classes within the proposed compensation structure. Combined with market data, this information formed the foundation of the combined compensation and classification recommendations. The nature of each compensable factor is described below:

- Leadership -relates to the employee's individual leadership role, be it as a direct report of others who have leadership responsibilities, or as an executive who has leadership over entire departments.
- Working Conditions -deals with the employee's physical working conditions and the employee's impact on those conditions, as well as the working conditions impact or potential impact on the employee.
- Complexity -describes the nature of work performed and includes options ranging from entry-level manual or clerical tasks up to advanced scientific, legal, or executive management duties.
- Decision Making -deals with the individual decision-making authority of the employees. Are decisions made on behalf of the employee or is the employee making
autonomous decisions that impact the individual, other employees, or even the entire organization and its constituents?
- Relationships -deals with organizational structure and the nature of the employee's working relationships. Responses range from employees who work primarily alone, those who work as members of a team, those who oversee teams, and even those who report to elected officials or the general public.

## Salary Survey

The external market is defined as identified peer organizations similar positions as well as similar characteristics, demographics, and service offerings. Benchmark positions are identified from each area and level of the organization and typically include a large crosssection of positions at the County. Once the target and benchmark information was finalized, classification information from the County was used to find comparable positions from peer organizations.

## Classification/Job Description Revision

Based on employee feedback and supervisor comments on the JAT, classification descriptions will be updated to better reflect actual work performed and revisions to the class structure.

## Recommendations: Pay Schedule and Transition Costing

During the solution and recommendation phase, alternative pay structures were designed to provide different scenarios to the County on how it can best address challenges observed throughout the study. Once the structures were created, classifications were then slotted into the proposed pay grade structures using market data, the results of the JAT analysis, and management feedback, including the desired market position of the County.

The final step in the development of recommendations consisted of identifying the costs associated with each step of the analysis, where data from the classification slotting process are applied to the individual employees in the organization. This allowed the County to view the total costs associated with proposed structural changes. Information was then provided to the County on various ways to implement the proposed structure and additional recommendations were provided to ensure the County could maintain the structure for years to come.

### 1.3 REPORT ORGANIZATION

This report includes the following additional chapters:

- Chapter 2 - Summary of Employee Outreach
- Chapter 3 - Assessment of Current Conditions
- Chapter 4 - Market Summary
- Chapter 5 - Recommendations

## Chapter 2 - Summary of Employee Outreach

During the spring of 2018, Evergreen consultants conducted a series of orientation sessions, employee focus groups, and interviews with County employees. Orientation sessions were designed to instruct County employees on what to expect from the Job Assessment Tool (JAT) and the study overall. Focus group questions were designed to solicit input on a number of topics related to this compensation and classification study. Findings from focus groups and interviews are separated by category below.

Comments are separated by the following four categories below:

### 2.1 General Feedback

2.2 Compensation \& Classification
2.3 Market Peers
2.4 Summary

### 2.1 GENERAL FEEDBACK

Employees commonly regard the County as a good, stable place to work. Several employees mentioned that the County has a good reputation and that they were proud to work somewhere they could help the community. Some of the employees' specific positive comments regarding employment with the County included the following:

- Employees regularly cited good co-worker relationships, excellent benefits, and believe they are making a positive difference with the County.
- Many employees cited the positive work hours and the good work-life balance they were able to maintain as a positive factor in working from the County.
- A number of employees mentioned that there is good opportunity for advancement within such a large organization. It was viewed as a positive factor that you were able to spend your entire career with the County and keep advancing throughout. The current County Administrator was given as a primary example by several employees of someone who had worked her way through the system and had been rewarded.
- Many employees like working in a convenient location close to home. The fact that they had an opportunity to improve the quality of life for their families and friends was seen as a benefit to working for the County.
- One final theme that was mentioned throughout was the stability of the job and the fact that employees enjoy great job security at the County. There were a number of employees who mentioned that they worked with the County throughout the great recession and were thankful they never had to worry about losing their job, as many people in the private sector did.

Employees also suggested several areas where the County could improve. Most employees felt that regular compensation and classification studies are important to ensure that the structure remains aligned with industry practices. Employees felt like it had been much too long since the last compensation and classification study had been conducted. The following suggestions highlight the main concerns expressed by employees during focus groups:

- Many employees expressed a concern that the pay is not as competitive now as it was when they joined the County. Some employees felt like the County wasn't keeping up with the market the way it needs to in order to retain its best workers.
- Many employees mentioned concerns with jobs evolving over time and how that impacts compensation. They believe they are being paid fairly for the work they were performing five years ago, but that the County hasn't accurately tracked the additional work they have picked up in the recent years or months.
- Employees expressed concern that the evaluation experience varied across the County, and that consistency of execution by supervisors may lead to different promotional opportunities for different employees.
- A common concern among employees was compression within a pay grade or department. Employees were concerned that when they were not granted raises during the years of the great recession, employees who newly joined the County were making a salary that is too close to salaries of tenured employees. Without accounting for the years spent at the County when no raises were given, employees are concerned that this issue cannot be fixed.

### 2.2 COMPENSATION AND CLASSIFICATION

As the main focus of this study, lots of feedback on compensation and classification was gathered from employees. Employees were asked to identify any concerns, challenges, or limitations observed with how the County currently compensates and classifies its positions. It is important to note that the perceptions of employees listed below do not necessarily reflect or align with the data collected in the market survey, found in Chapter 4.

Specific feedback shared by employees related to compensation practices included the following:

- Classification of jobs: Many employees were concerned that jobs were not being properly classified at the County, and that could impact compensation as well. Employees shared that they have had expanding job duties over the years and that they haven't seen an increase in compensation accompanying the increase in duties.

Employees at the County would like to feel like they are being compensated fairly for the work they perform.

- Exempt vs. Non-exempt: Some employees weren't sure why some jobs were classified exempt and others non-exempt. There was a sentiment with some employees that they are performing the same type of work as other employees, but are given a different FLSA designation.
- Advancing through the organization: While it was already shared that many employees felt there were excellent advancement opportunities within the County, a few employees did not agree with that. Some employees thought there should be more of a career ladder with automatic advancement through positions when certain performance goals were met. Jobs were mentioned across the organization in several different departments as potential jobs that should have automatic promotion opportunities.
- Job Descriptions need updates: Employees generally believed it has been too long since Job Descriptions have been updated. A common concern throughout the majority of focus groups was that employees did not believe their job description represents the work they are performing on a day-to-day basis. Employees were thankful that the County has started the classification and compensation study and are addressing these concerns.

### 2.3 MARKET PEERS

Employees were also asked to provide information about who they believe are the most important market peers to compare the County against in order to maintain a high degree of external equity. Employees were asked to consider physical proximity to the County, whether or not they knew of specific employees who had left the County to work at the competing organization they mentioned, and to provide examples of organizations who are structured similarly to the County. Included below is a list of some of the most commonly mentioned peers.

- Brevard County
- Broward County
- Collier County
- Glades County
- Hendry County
- Hillsborough County
- Indian River County
- Lee County
- Martin County
- Miami-Dade County
- Monroe County
- Palm Beach County Fire Rescue Department
- Palm Beach Sheriff's Office
- Pinellas County
- Sarasota County
- City of Boca Raton
- City of Coral Springs
- City of Fort Lauderdale
- City of Jacksonville
- City of Jupiter
- City of Miami
- City of Palm Beach Gardens
- City of Wellington
- City of West Palm Beach
- FPL

The listed organizations were used when sending out the market survey (discussed in Chapter 4) and should be considered the "public-sector market" when that term is used elsewhere in this report.

### 2.4 SUMMARY

It should be noted that many of the concerns discussed in this section are common in other organizations, and though they are shared by many employees, overall employees appreciate the County as a great place to work. Many positive attributes of working for the County were mentioned by employees and the morale was generally positive throughout the focus groups and orientation sessions. County employees were very passionate about wanting to see certain aspects of their work life changed (for example, the feelings that the evaluations were not consistent across departments or feelings that certain jobs should have different FLSA statuses), but most of the identified issues are seen throughout public-sector organizations all over the Country.

As a whole, the County's employees enjoy their jobs and believe they are performing worthwhile work. While there are opportunities for improvement that could increase employee satisfaction, the County has done an excellent job at providing a happy and stable work environment for employees. The information received from employees assisted Evergreen in the development of recommendations and provided an excellent foundation for the remainder of this study.

The purpose of this chapter is to give an account of the conditions that were present in the County at the beginning of the study, illustrated through statistical analysis. Data included in this chapter should be considered a snapshot in time and were sourced from the County on May $9^{\text {th }}, 2018$. As conditions in any organization can change rapidly, the data in this chapter should be used to gain a broad understanding of conditions present in the County before this study and should not be considered current at the time this report is published. All pay ranges, employee salary data, and analysis in this chapter were formed before Evergreen began work on the study. To review the County's newly recommended pay plan, please see Chapter 5. Data in this chapter were not used in isolation to form recommendations, but were taken together with the market data (covered in Chapter 4 of this report) to help Evergreen understand the needs of the County. The assessment is divided into the following sections:

### 3.1 Analysis of Pay Plans

3.2 Grade Placement Analysis
3.3 Quartile Analysis
3.4 Compression Analysis
3.5 Summary

### 3.1 ANALYSIS OF PAY PLANS

The purpose of analyzing the pay plan utilized in the County is to help Evergreen gain a better understanding of the existing compensation philosophy within the County. The County uses a single pay plan for all employees, going from Grade $09-49$, with an additional ten grades used for executives, and with grade names E01 - E10. Exhibit 3A displays the County's pay plan, summarized for ease of comparison. Displayed are the grade name, defined minimum, midpoint, and maximum of each grade, range spread, midpoint progression, and a count of employees within each grade. Empty pay grades were excluded from all analysis in this chapter.

An explanation of banded pay ranges will be necessary to make sense of the County pay plan. A banded pay range differs from a typical pay range in that it has a much wider range spread. Banded ranges can have range spreads anywhere from 100-2000 percent. That differs from a typical pay grade that would normally expect a range spread from 50-70 percent. The advantage of a banded pay grade is that it allows much more flexibility when assigning salaries than a typical range. While a 40-50 percent pay range might be sufficient for a position like "Accountant I", a banded range, like pay range 00, is perfect for positions that can vary widely with respect to the market. County Administrator, County Attorney, and Inspector General are all examples of positions whose salaries could vary widely depending on the size of the
organization, the level of competency, and the level of experience and expertise an employee brings to the County. One final thing to note with respect to banded pay ranges: although the pay band has a minimum and maximum, it would be unrealistic to assign those minimums and maximums to a particular employee on that pay band. A feature of banded ranges is that employees assigned to the pay band will typically only occupy a portion of the pay band. It would be extremely rare to see an employee go from the minimum salary on a pay band to the maximum. Given these differences to normal pay grades, the banded pay range 00 has been excluded from some of the following analysis.

The general County pay plan in place at the beginning of the study is displayed in Exhibit 3A. Some notes about the pay plan:

- The minimum (non-banded) salary offered to any County employee is $\$ 25,911.00$.
- The maximum salary offered to any County employee is $\$ 258,873.00$.
- The County has a minimum of one employee occupying the E10 grade
- The County has a maximum of 218 employees occupying pay grade 25

## EXHIBIT 3A COUNTY PAY PLAN

| Pay Plan | Grade | Minimum | Midpoint | Maximum | Range Spread | Midpoint Progression | Employees |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| General | 00 | \$ 17,707 | \$ 193,056 | \$ 368,405 | 1981\% | - | 45 |
| General | 09 | \$ 25,911 | \$ 34,132 | \$ 42,353 | 63\% | - | 70 |
| General | 10 | \$ 26,622 | \$ 35,129 | \$ 43,636 | 64\% | 3\% | 6 |
| General | 11 | \$ 27,410 | \$ 36,173 | \$ 44,936 | 64\% | 3\% | 15 |
| General | 12 | \$ 28,234 | \$ 37,259 | \$ 46,284 | 64\% | 3\% | 63 |
| General | 13 | \$ 29,070 | \$ 38,360 | \$ 47,651 | 64\% | 3\% | 164 |
| General | 14 | \$ 29,863 | \$ 39,413 | \$ 48,963 | 64\% | 3\% | 108 |

| General | E10 | \$ 143,275 | \$ 201,074 | \$ 258,873 | 81\% | 7\% | 1 |

Comparing the summary data in Exhibit 3A to best practices, a number of observations can be made regarding the County pay plan. The following facts can be observed from studying the County pay plan:

- Range spread - generally set between 50-70 percent - is very consistent across all pay grades. Each standard pay grade has a range spread of sixty-four percent, with one exception having a range spread of sixty-three percent. All executive pay grades have a range spread of eighty-one percent, with the lone exception having an eighty-two percent range spread.
- The number of incumbents per pay grade varies widely, with some pay grades having fewer than ten employees occupying the grade and some with a few hundred. There are seventy-eight employees per pay grade, on average.
- Midpoint progression, which is typically between three and five percent, is consistently set to three percent. This is true through the entire general pay plan until you reach the executive pay grades, where the midpoint progression is seven percent.

### 3.2 GRADE PLACEMENT ANALYSIS

The Grade Placement Analysis examines how individual salaries are placed within a pay grade. In the simplest examination of salary placement, salaries are examined to see if they are located at the minimum or maximum of the pay grade, and whether they are above or below midpoint. These basic indicators can give some information on progression patterns and whether or not there exists compression at the very top or bottom of a pay grade. Once the simplest analyses are complete, a more in-depth analysis takes place to see which quartile salaries fall into, and then salaries are further examined to see how they align with employee tenure. Ideally, you would see a small percentage of employees at the minimum or maximum of their pay range, a relatively equal number of employees above and below midpoint, and you would see tenure increase as you move from Quartile 1 to Quartile 4.

Exhibits 3B displays the percentage of employees compensated at the pay grade minimum and pay grade maximum thresholds. The percentages presented are based on the total number of employees in that grade. As shown in the exhibit, 13.6 percent ( 557 total) of all employees are compensated at their pay grade's minimum. A lower percentage of employees, at 8.2 percent ( 335 total), are compensated at their pay grade's maximum.

| E10 | 1 | 0 | $0.0 \%$ | 0 | $0.0 \%$ |
| Total | 4081 | 557 | $13.6 \%$ | 335 | $8.2 \%$ |

In addition to assessing the number of employees at minimum and maximum, an analysis was conducted to determine the number of employees below and above pay grade midpoint. The percentages refer to the percentage of employees in each pay grade that are above and below midpoint. Exhibit 3C displays the results of this analysis. A total of 3,272 employees are compensated below their pay grade midpoint - which is 80.2 percent of all employees for the County. 809 employees, or 19.8 percent, are compensated above midpoint of their pay grade. While this is a higher percentage of employees below the midpoint than would typically be ideal, we will need to examine the data more closely before we can make any definitive statements about County pay practices. A balance tipped towards employees below midpoint can be an indicator of County pay trailing the market, but it can also be an indicator of high employee turnover. The Quartile Analysis will shed more light on these salaries.

### 3.3 QUARTILE ANALYSIS

The last part of the Grade Placement Analysis is a detailed look at how salaries are distributed through pay grades, through a quartile analysis. Here, each pay grade is divided into four segments of equal width, called quartiles. The first quartile represents the first 25 percent of the pay range; the second quartile represents the part of the range above the first quartile up to the mathematical midpoint; the third quartile represents the part of the range from the midpoint to 75 percent of the pay range; and the fourth quartile represents the part of the range above the third quartile up to the pay range maximum. Employees are assigned to a quartile within their pay range based on their current salary.

The Quartile Analysis is used to examine employee salary placement more closely, and to see if any clusters of salaries exist within the organization. Employee tenure is also examined along with salary placement, so that will provide information about why salaries are clustered where they are. As determined in the midpoint analysis, a significantly larger number of employees are below midpoint, and therefore in Quartile 1 and Quartile 2, than are above midpoint. The tenure portion of the Quartile Analysis will help determine if this a result of high turnover or a lack of progression through salary ranges as employees stay with the County. This information, while not definitive alone, can shed light on any root issues within the current compensation and classification plan when combined with market data and employee feedback.

Exhibit 3D shows the number of employees that are in each quartile of each grade, as well as the average overall tenure (i.e. how long an employee has worked for the County) by quartile. At the time of this report, 59.5 percent of County employees fall into Quartile 1, 20.7 percent of employees are in Quartile 2, 7.3 percent of employees occupy Quartile 3, and the remaining 12.5 percent of employees reside in Quartile 4 . When examining these numbers with County tenure factored in, a clearer picture starts to form.

Specifically, overall average tenure does increase with progression through pay grades, so while there is a very high number of employees occupying Quartile 1, this is most likely the result of high turnover at the County and a relatively newer workforce. Employees in Quartile 1 have an average tenure of 7.4 years, employees in Quartile 2 average 14.7 years of tenure, Quartile 3 employees average 21.1 years, while Quartile 4 employees average 27.8 years of County tenure. This would seem to indicate that, in general, employees are moved through their pay grades equitably, or at the very least a positive linear relationship exists between tenure and pay.

Exhibit 3D displays a graphical representation of the data contained in Exhibit 3E. Each pay grade is divided into up to four sections representing the percentage of employees, in that pay grade, who belong in each quartile. For example, pay grade E10 has zero employees in Quartile 1, 2, or 4. That pay grade is represented by a 100 percent gold bar, showing that one hundred percent of E10 employees are in Quartile 3. Pay grades 13-46 have employees in all four quartiles represented, however, and are consequently shown with bars displaying four different colors, corresponding to the percentage of employees in each pay grade occupying each quartile.

| Overall | 4081 | 12.1 | 2426 | 7.4 | 846 | 14.7 | 299 | 21.1 | 510 | 27.9 |

When examining the data from the preceding charts and tables, it becomes clear quickly that the County is dominated by workers in the first quartile, throughout most of the pay plan. Even up into the executive ranges, there is more orange (representing Quartile 1) on the chart than any other color. While Quartile 1 employees are the predominant type throughout the organization, it can also be noted that the percentage of Quartile 1 employees does decrease slightly as the pay grades increase into the upper 30's and 40's. This can be a sign that as employees stay with the County throughout their careers, there is a chance for employees to move up into higher pay grades. This pattern is far from definitive, but it does hint at some level of pay grade progression.

### 3.4 COMPRESSION ANALYSIS

Pay compression can be defined as the lack of variation in salaries between employees with significantly different levels of experience and responsibility. Compression can be seen as a threat to internal equity and morale. Two common types of pay compression can be observed when the pay of supervisors and their subordinates are too close, or when the pay of highly tenured staff and newly hired employees in the same job are too similar.

According to the Society for Human Resources Management (SHRM), specific examples of actions that may cause pay compression include the following:

- Reorganizations change peer relationships and can create compression if jobs are not reevaluated.
- In some organizations, certain departments or divisions may be relatively liberal with salary increases, market adjustments, and promotions - while others are not.
- Some employers have overlooked their Human Resources policies designed to regulate pay, paying new hires more than incumbents for similar jobs under the mantra of "paying what it takes to get the best talent."
- Many organizations have found it easy to hire people who had already done the same work for another organization, eliminating the need for training. Rather than hiring individuals with high potential and developing them for the long term, they have opted for employees who could "hit the ground running"-regardless of their potential.

Exhibit 3F displays graphically the relationship between employees' salaries and their direct supervisors' salaries, while Exhibit 3G displays the exact same information in table form. The green bar represents employees whose salaries are less than eighty percent of their supervisors' salary, the gold bar represents employees whose salaries are more than eighty percent but less than ninety-five percent of their supervisors' salary, the orange bar represents employees whose salaries are five percent or less below their supervisors' salary, and the blue bar represents employees whose salaries are greater than their supervisors' salary. Less than 80 percent would indicate that the ratio of an employee's salary to his supervisor's salary would yield a result of less than 0.8 . For example, an employee with a salary of $\$ 79,000.00$ and a supervisor with a salary of $\$ 100,000.00$ would yield a ratio of 0.79 , and be placed into the Less than 80 percent category.

Far and away the most common category occupied is the "less than eighty percent" category. This category represents the optimal salary spacing between a supervisor and their direct report, on average. It is a best practice to leave some space between a supervisor's and direct report's salary to maintain a sense of internal equity, and also to compensate a supervisor fairly for having the responsibility of managing another employee's work in addition to their own. There may be reasons why an individual has a salary almost equal to that of their supervisor's. An employee with decades of experience might expect to make amount that is close to what a brand-new supervisor is making, or even slightly more in rare cases. That will always be the exception, rather than the rule, so the optimal placement for the organization as a whole will always be to see about twenty percentage points of space or more between an employee's salary and their supervisor's. The overall ratio between direct reports and their supervisor salaries for the County at the time of this writing is approximately 0.7 , so the County is doing well in this regard overall.

However, there is some compression present, especially at the top of the pay plan, and this should be something that is evaluated more closely to decide if there is additional action needed. While salaries between eighty and ninety-five percent of the supervisor rate may be adequate space between most jobs, the supervisor and employee salaries within five percent of each other - and especially those supervisors making less than their direct reports - should be examined closely to see if additional spacing would be beneficial.

Exhibit 3H and Exhibit 3I showcase the actual vs. expected salaries for all County employees, displayed by pay grade. Expected salary is calculated using a thirty-year progression assumption for employees, and does not factor in the market rate at all. This salary is calculated solely from the expectation of where an employee would fit into the current pay grades at the County, and does not factor in whether or not the County's pay range is market competitive. For information on salaries vs. the market, please see Chapter 4. For example, an employee who had worked at his position for fifteen years would expect to be at the grade midpoint, while an employee with thirty or more years of class years would expect to be at the grade maximum. An important distinction between this compression table and the quartile analysis: this compression table utilizes class years, while the Quartile analysis uses tenure. Class years are differentiated from tenure by using the date that you started working in your current classification as the start date, instead of the date you first were hired by the County. To illustrate, if an employee had been working for the County as an accountant for fifteen years, and then was promoted last year to Accountant Supervisor that employee would have fifteen years of tenure, but only one class year.

The first thing you will notice when looking at Exhibit 3I, is that the vast majority of employees in the County are within five percent of their expected salary. Employees from approximately pay ranges $09-35$ are highly likely to be paid within five percent of their expected salary, which means that these employees are typically receiving annual increases close to what they would expect, based on tenure alone. The average tenure of all County employees is 12.1 years, which is slightly more than the national average of eleven years for all county government employees.

As you study the highest numeric pay grades and executive pay grades, you will see that these employees typically are receiving more than five percent above their expected salary, which indicates that these employees are being moved through their ranges more quickly than employees in the lower pay grades. One possible explanation for this difference is that when an employee has advanced to near the top of his pay grade and he receives a promotion, he will often not start at his new pay grade minimum. An employee will not accept a pay decrease, so that employee is therefore started above the minimum on his new pay grade. That puts him above his "expected pay", by definition. He has zero class years, but his pay is above the minimum. Then, if he advances exactly at the speed expected for the rest of his career, he will always remain above his "expected" pay. Another possible explanation could be that there is increased market pressure at the highest levels of county government from the private sector. This market pressure could force the County to hire employees to salaries that are well above the typical starting point in their pay ranges. More data would be required to make a more definitive statement.

### 3.5 CONCLUSION

The County utilizes a single pay plan to classify their employees, and that plan is divided into standard pay grades and executive pay grades. This allows for a high level of consistency between employees of different grades, and allows all employees within the County to understand the pay plan and know exactly how their salary could progress in the future. Some observations that were made about the County's compensation system included:

- Range spread, generally recommended to be between 50-70 percent, is very consistent within the County. Range spread is sixty-four percent for all general pay grades except one and eighty-two percent for all executive grades except one.
- The County has almost fifteen percent of its workforce making the minimum salary for their pay grade and over half of all employees at the County in Quartile 1 of their pay grade. The average tenure for Quartile 1 employees is only 7.4 years, so these are relatively new employees. This could indicate a workforce with high turnover or that has recently expanded with many new hires. Further analysis is required to determine the cause of this imbalance.
- More than eighty percent of County employees are paid below their grade's midpoint.
- Most County employees are paid less than 80.0 percent of their supervisors' salaries.
- The County has a strong relationship between pay grade penetration and tenure. This hints that even though the County has a majority of its workforce in Quartile 1 of their respective pay grades, that is because they have a relatively new workforce and those employees will advance through their range if they stay with the County.
- Approximately fifty percent of all County employees are paid within five percent of their expected salary, when based on time spent in that classification. Another twenty-five percent of employees are paid more than five percent above their expected salary, which means that seventy-five percent of County employees are paid at or above their expected salary. This does not factor in the market rate, but it does suggest that the County is moving employees through their pay ranges in an equitable manner in most cases.

This analysis acts as a starting point for development of recommendations in subsequent chapters of this report. Paired with market data, Evergreen is able to make recommendations that will ensure that the County's compensation system is structurally sound in terms of best practice, competitive with the market, and treats all employees equitably moving forward.

## Chapter 4 - Market Summary

The purpose of the market summary chapter is to benchmark the County's compensation practices against that of its market peers in order to establish how competitive the County is for employees within its market. To complete this market study, Evergreen compared pay ranges of select benchmark positions that the County possesses against the compensation of positions performing those same duties within peer organizations. By aggregating the differences in pay ranges across all the positions, a reasonable determination is made as to the County's competitive position within the market.

It is important to note that individual salaries are not analyzed in this methodology, since individual compensation can be affected by a number of variables such as experience and performance. For this reason, Evergreen looked at average pay ranges across the entire classification to make the most accurate comparison. The results of this market study should be considered reflective of the current state of the market at the time of this study, however, market conditions can change rapidly. Consequently, it is necessary to perform market surveys of peer organizations at regular intervals in order for an organization to consistently monitor its position within the market. Furthermore, the market results detailed in this chapter provide a foundation for understanding the County's overall structural standing to the market, and the rates reflected in this chapter, while an important factor, are not the sole determinant for how classifications were placed into the proposed salary ranges outlined in Chapter 5.

Evergreen conducted a comprehensive market salary survey for the County, which included two local organizations, nine cities and 13 counties responding to 149 benchmark positions. Of the 24 total organizations contacted, 21 responded and provided data for the benchmark positions. Target peers were selected based on a number of factors, including geographic proximity and population size. Target organizations were also identified for their competition to the County for employee recruitment and retention efforts. The list of targets that provided data for the purpose of this study are included in Exhibit 4A.

## EXHIBIT 4A

TARGET MARKET PEERS

| Respondent Organizations |
| :--- |
| Brevard County |
| Broward County |
| Collier County |
| Hillsborough County |
| Indian River County |
| Lee County |
| Martin County |
| Miami-Dade County |
| Monroe County |

| City of Coral Springs |
| City of Fort Lauderdale |
| City of Jacksonville |
| City of Jupiter |
| City of Miami |
| City of Palm Beach Gardens |
| City of Wellington |
| City of West Palm Beach |

Due to the fact that the data collected for the market summary was from various regions of Florida, it was necessary to adjust peer responses relative to the County based on cost of living. For all organizations that fell outside the County's immediate region, a cost of living adjustment was applied to the reported pay ranges to ensure a market average was attained in terms of the spending power an employee would have in the County. Evergreen utilizes cost of living index information from the Council for Community and Economic Research, and the scale is based on the national average cost of living being set at 100. The cost of living index figures for The County and each of the respondent market peers are located in Exhibit 4B.

## EXHIBIT 4B <br> RESPONDENTS WITH COST OF LIVING ADJUSTMENTS

### 4.1 MARKET DATA

The results of the market study are displayed in Exhibit 4C, which includes the benchmark job titles and the market average salaries for each position at the minimum, midpoint, and maximum points of the pay ranges. Also included within the exhibit are the percent differentials of the County's pay ranges at each respective point, relative to the market average pay. A positive percent differential is indicative of the County's pay range exceeding that of the average of its market peers; alternatively, a negative percent differential indicates the County's compensation for a given position lagging behind the average of its peers. For those classifications where no differential is shown, this is due to the County not possessing a pay range for comparison to the market. The exhibit also includes the average pay range
for the market respondents for each position, as well as how many responses each benchmark received.

While all benchmarks are surveyed by each peer, not every peer organization possesses an appropriate match to supply salary information for. Consequently, the benchmarks receive varying levels of response. For the purpose of this study, all positions that received less than five matches from market peers were not considered in establishing the County's competitive position. The rationale behind these positions being excluded is that insufficient responses can lead to unreliable averages that may skew the aggregated data, blurring the reality of the County's actual position in the market. 140 of the 149 positions surveyed had a sufficient response for inclusion.

### 4.2 SALARY SURVEY RESULTS

## Market Minimums

It is important to assess where an organization is relative to its market minimum salaries, as they are the beginning salaries of employees with minimal qualifications for a given position. Organizations that are significantly below market may experience recruitment challenges with entry-level employees. As seen in Exhibit 4C, the County is currently 0.2 percent below the market average minimum, when considering positions with sufficient responses. The County's benchmark positions ranged from 22.9 percent below to 29.9 percent above the market minimum.

The following are summary points of the results analysis concerning the market minimum:

- Of the 140 County positions receiving sufficient response, 62 were below market, averaging 7.7 percent below. These 62 classifications represent roughly 44.3 percent of all surveyed positions receiving sufficient response.
- Of the 62 positions below market, 24 were more than 10.0 percent below the average market minimum. These positions are displayed in Exhibit 4D.

## EXHIBIT 4D

CLASSIFICATIONS MORE THAN 10\% BELOW THE MINIMUM

| Classifications More than 10\% Below Market | Diff |
| :--- | :---: |
| COMMUNITY OUTREACH SPECIALISTI | $-22.9 \%$ |
| ANIMAL CARE AND CONTROL MANAGER | $-21.5 \%$ |
| PARALEGALI | $-17.4 \%$ |
| BUDGET MANAGER | $-16.7 \%$ |
| COMMUNITY OUTREACH SPECIALIST III | $-16.4 \%$ |

| EXECUTIVE DIRECTOR PLANNING, ZONING \& BUILDING | $15.3 \%$ |
| VETERANS SERVICES OFFICER | $22.6 \%$ |
| COUNTY ENGINEER | $29.9 \%$ |

## Market Midpoints

The market midpoint is exceptionally important to analyze, as it is often considered the closest estimation of market average compensation. As seen in Exhibit 4C, the County is currently 1.9 percent above the market midpoint.

Analysis of the market midpoint comparisons yielded the following information:

- With respect to the midpoint average, 52 of the surveyed positions receiving sufficient response were below the market midpoint, averaging 7.2 percent below. These 52 positions represent 37.1 percent of the positions surveyed.
- Of the 52 positions below the market midpoint, 16 were more than 10.0 percent below the midpoint. These positions are displayed in Exhibit 4F.
- Of the 140 positions receiving sufficient response, 83 were above the market midpoint. These comprise 59.2 percent of the total classifications surveyed.
- 24 positions were more than 10.0 percent above the market midpoint. Those positions are displayed in Exhibit 4G.

## EXHIBIT 4F

| EXECUTIVE DIRECTOR PLANNING, ZONING \& BUILDING | $22.3 \%$ |
| COUNTY ENGINEER | $35.3 \%$ |

## Market Maximums

The pay range maximum averages, and how they compare to the County's, are also detailed in Exhibit 4C. The County is, on average, 3.1 percent above the market at the maximum of its salary bands for these 140 classifications. It is important to understand that the differentials mentioned here, and elsewhere in this chapter, refer to the pay grades that the County uses and not to individual salaries for employees. While the County does lead the market by a few percentage points at the maximum, the percentage of employees who are currently paid their pay grade maximum is very small overall.

The following points are regarding the County's position relative to the market average maximum:

- At the market maximum, 47 of the 140 positions fell below the average, averaging 7.1 percent below. These 47 positions represent 33.6 percent of the total number of positions surveyed.
- Of these 47, 15 fell more than 10.0 percent below the market maximum. These 15 positions are displayed in Exhibit 4H.
- Of the 140 surveyed positions receiving sufficient response, 88 were above the market maximum. These 88 positions represent 62.9 percent of the total number of positions surveyed.
- Of the 88 above average positions, 25 of them were more than 10.0 percent above the market maximum. The positions are displayed in Exhibit 4I.

### 4.3 SALARY SURVEY CONCLUSION

The standing of individual classifications pay range relative to the market should not be considered a definitive assessment of actual employee salaries being similarly above or below the market; however, such differentials can, in part, explain symptomatic issues with recruitment and retention of employees.

The main summary points of the market study are as follows:

- The County is approximately 0.2 percent below the market minimum.
- The County is approximately 1.9 percent above the market midpoint.
- The County is approximately 3.1 percent above the market maximum.
- The County's pay range spread is approximately 67.0 percent, while its peers' pay range spread is only 61.1 percent. That means that the County's salary scale is wider than its peers, and as a result, even though the County is slightly below the average compared to the market at the minimum, it catches up to its peers at the higher end of the spectrum and surpasses the market by a few percentage points at the pay range maximum.

The results of the market summary chapter are pivotal in the formulation of recommendations by Evergreen Solutions. By establishing the County's market position relative to its peers, Evergreen is better able to propose recommendations that enable the County to occupy its desired competitive position.

EVERGREEN SOLUTIONS, LLC

## Chapter 5 - Recommendations

After reviewing the information provided in the preceding chapters of this report, Evergreen developed recommendations to improve the County's current classification and compensation system. The recommendations, as well as the findings that led to each recommendation, are discussed in detail in this chapter. The recommendations are organized into three sections: classification, compensation, and administration of the system.

### 5.1 CLASSIFICATION RECOMMENDATIONS

An organization's classification system establishes how its human resources are employed to perform its core services. The classification system consists of the titles and descriptions of the different classifications, or positions, which define how work is organized and assigned. It is essential that the titles and descriptions of an organization's classifications accurately depict the work being performed by employees in the classifications in order to ensure equity within the organization and to enable comparisons with positions at peer organizations. The purpose of a classification analysis is to identify issues such as incorrect titles, outdated job descriptions, and inconsistent titles across departments. Recommendations are then made to remedy the identified concerns based on human resources best practices.

In the analysis of the County's classification system, Evergreen collected classification data through the Job Assessment Tool (JAT) process. The JATs, which were completed by employees and reviewed by their supervisors, provided information about the type and level of work being performed for each of the County's classifications. Evergreen reviewed the data provided in the JATs and used the information as the basis for classification recommendations.

## FINDING

The classification system being utilized by the County was generally accurate, and titles described the work being performed by employees. Furthermore, the County does not have an overly excessive number of unique classification titles relative to the various types of worked performed at the County. However, two areas where the County's current classification system could be improved are how its administrative support classifications are titled and how the titling convention of director is administered.

The County currently has a variety of classifications and levels of positions acting in an administrative support capacity. Evergreen found 23 unique titles to be in use across the County that were operating in this capacity to varying degrees, however, the information gathered from the JATs indicated that this number was well in excess to the actual variation of general type and level of work performed. Furthermore, in reviewing other organizations of similar size, Evergreen has found it to be uncommon to find entities with more than ten or so classifications being utilized to differentiate the various types of administrative support roles.

As a result, the County is carrying significantly more unique titles than necessary for this employee group. While this is a common occurrence, particularly in this job family, this can cause issues when trying to establish and maintain internal equity amongst roles that are titled differently but perform highly similar work. Lastly, a number of the conventions still in use by the County for this job family are also dated and not as commonly seen in today's market place, with the most distinct examples being the convention of typist and secretary.

RECOMMENDATION 1: Adopt a new classification series for the administrative support classifications.

In order to help the County better establish and maintain internal equity amongst these various roles, Evergreen has developed a recommended administrative support classification series for the County's consideration. The new classification series reduces the number of unique titles from 19 to eight, and also leverages titling conventions more in line with those used by the County's peers and other governmental agencies nationwide. Exhibit 5A depicts the existing titles that fall under this grouping, and the recommended title from the new series that each role would move to.

EXHIBIT 5A
PROPOSED ADMINISTRATIVE SUPPORT RECLASSIFICATIONS

| Current Title | Recommended Title |
| :--- | :--- |
| RECEPTIONIST III | RECEPTIONIST |
| CLERK TYPIST | ADMINISTRATIVE CLERK I |
| CLERICAL SPECIALIST | ADMINISTRATIVE CLERK I |
| SENIOR CLERK TYPIST | ADMINISTRATIVE CLERK I |
| LEGAL CLERK | ADMINISTRATIVE CLERK II |
| SECRETARY | ADMINISTRATIVE CLERK II |
| LEAD CLERK | ADMINISTRATIVE CLERK II |
| SENIOR SECRETARY | ADMINISTRATIVE ASSISTANT I |
| ADMINISTRATIVE SECRETARY I | ADMINISTRATIVE ASSISTANT I |
| ADMINISTRATIVE SECRETARY | ADMINISTRATIVE ASSISTANT I |
| MEDICAL SECRETARY | ADMINISTRATIVE ASSISTANT I |
| ADMINISTRATIVE SECRETARY II | ADMINISTRATIVE ASSISTANT II |
| LEGAL SECRETARY | ADMINISTRATIVE ASSISTANT II |
| ADMINISTRATIVE ASSISTANT | ADMINISTRATIVE ASSISTANT III |
| ADMINISTRATIVE SECRETARY III | ADMINISTRATIVE ASSISTANT IV |
| EXECUTIVE ASSISTANTI | EXECUTIVE ASSISTANT I |
| EXECUTIVE ASSISTANT II | EXECUTIVE ASSISTANT II |
| EXECUTIVE ASSISTANT III | EXECUTIVE ASSISTANT III |
| EXECUTIVE ASSISTANT TO THE COUNTY ATTORNEY | EXECUTIVE ASSISTANT III |

The second area in which the County could streamline its current classification system is in its use of the director titling convention. Currently, the County has 126 classifications that leverage the title of director in one form or another. This includes positions that oversee programs, multiple service areas, and small and large departments with varying degrees of budget, staff, and organizational impact. While is not uncommon to have a unique title for each traditional department head, the County's overall size and vast array of service areas have led to a proliferation of individuals leverage this same titling convention. This becomes a challenge for an organization when there is little or no means of differentiating the various levels of work that these roles fulfill in the organization. Currently, the County uses traditional conventions such as assistant, deputy, and executive director to help differentiate, but the applications of these secondary titles are not uniform across the County.

## RECOMMENDATION 2: Adopt a new classification series for director classifications.

Similar to the work done on the administrative support series, Evergreen has recommended a simpler overall classification series for 126 unique classifications currently utilizes the director titling convention. The goal of the series is to help denote the level of work required by the position and differentiate between those positions responsible for managing programs, divisions, and whole departments. These titles are intended to be used for classifications purposes primarily, and the expectation would be that individuals would still be able to use working titles that denote the area of their responsibility, as the recommended classifications aim to group similar directors together, without denoting the areas of work expressly in the title. Due to the large number of classifications that would make this transition, the comprehensive list of recommended changes can be found in Appendix I.

In addition to the primary two areas of the organization identified in this report, Evergreen did find a small number of other classifications that were in need of adjustment in title or altogether reclassification, these changes will also be located in Appendix I. While the majority of classifications were not recommended for a change in title, up to date information was captured about the specific duties and requirements of each position as employees outlined the work performed within their respective roles in the JAT process. This will allow for the existing classification specifications to be updated to reflect the most up to date information.

RECOMMENDATION 3: Update current classification specifications and corresponding FLSA status to align with the recommended reclassifications and be reflective of the employee provided JAT information.

Evergreen will be providing the County with updated classification specifications, which encompass any edits or changes necessary to reflect the most current work being performed in the role. Also, included with the updated descriptions, Evergreen will also be providing a recommendation on the FLSA status of each classification as it relates to the updated tasks and responsibilities listed in the new description. The basis for these recommendations come from the input from employees and supervisors provided during the JAT collection process.

The updated classification specifications are separate from this report and are being provided to the County's human resources staff under separate cover.

### 5.2 COMPENSATION RECOMMENDATIONS

The compensation system analysis consisted of two parts: an external market assessment and an internal equity assessment. During the external market assessment, the County's pay ranges for selected benchmark classifications were compared to the average of the identified market. Details regarding the external market assessment were provided in Chapter 4 of this report.

During the internal equity assessment, consideration of the relationships between and the type of work being performed by the County's employees were reviewed and analyzed. Specifically, a composite score was assigned to each of the County's classifications that quantified the classification's level of five separate compensatory factors. The level for each factor was determined based on responses to the JAT.

## FINDING

The County's current pay ranges were well aligned with the current market average, with the County essentially at market at the minimums of its ranges ( 0.2 percent below), and above the market by the midpoint and maximum of its range by 1.9 percent and 3.1 percent respectively. Although the County's overall pay plan was found to be a simple, straight forward design, its simplicity is one of its greatest strengths. The County's current structure is also highly uniform with nearly standardized range spreads and midpoint progressions between successive ranges. However, given the competitive nature of the South Florida market the County operates within, a small overall adjustment to the plan may be needed to ensure the County maintains its desired market position.

RECOMMENDATION 4: Adjust the overall compensation structure by 3.0 percent and adjust the grade assignments for small number of classifications found to require adjustment.

In order for the County to maintain its at-market status with the overall average, it will be necessary for the County to shift its ranges to adjust for the annual market movement found in South Florida. With the strengthened economy, public organizations have been, on average, moving their structures by roughly 2-4 percent in recent years. Coupled with a strong movement in the Consumer-Price-Index (CPI) for the South Florida region, the County will find that if no adjustment is made to its ranges, that it will quickly lose ground in the labor market. As a result, Evergreen recommends the County adopt a 3.0 percent increase to its overall compensation plan. In addition to the overall adjustment, Evergreen proposed minor adjustments to salary ranges to help bring the County's range spreads and midpoint progressions to a more exact uniformity. Over time, there have been some small adjustments to individual salary ranges on an as needed basis, and this led to minor deviations from the overall uniformity of the pay plan. As such, Evergreen recommends the County take this opportunity to help bring its plan back into full alignment.

The details of the proposed pay plan rates are shown in Exhibit 5B.

## EXHIBIT 5B <br> PROPOSED ADJUSTED PAY PLAN

| Grade | Minimum | Midpoint | Maximum | Range <br> Spread | Midpoint <br> Progression |

RECOMMENDATION 5: Implement a living wage floor of 15 dollars per hour for all County employees.

After discussions with the County's leadership and Human Resources staff, Evergreen also has helped model for the County an alternative approach where the County both incorporates the overall adjustment contained within recommendation 4 but also adjusts the floor of the compensation structure to account for a living wage. This adjustment to the plan would see the County follow an overall growing trend across the nation, particularly in high cost of living areas such as Palm Beach County. This compensation philosophy decision ensures that the organization is offering not only competitive wages to its local market, but a living wage that helps ensure employees are able to adequately reside within the County they work for.

## IMPLEMENTATION

Implementation of the new compensation structure requires three steps. The first step is the assignment of classifications to appropriate pay ranges. Given Evergreen found the overall internal equity of the County's current plan to be sound, the majority of pay grade assignments were only necessary as part of the reclassification efforts recommended for the administrative support and director classifications. However, there were some instances where Evergreen found re-assignment of grades to specific classifications were necessary. The factors that were considered in order to assign all classifications were: the results of the JAT analysis, the results of the market study, and consideration for existing internal relationships between classifications. Recruitment and retention concerns for specific classifications also played a role in the process. Thus, the market results discussed in Chapter 4 were not the sole criteria for the proposed pay ranges. Prior to formal implementation, it is important that the County's human resources staff review the assignments of the selected implementation option.

The second step for implementing a selected structure is transitioning employee salaries into their newly assigned ranges. There are a variety of methods that can be employed to achieve this transition, and Evergreen has proposed seven alternatives for the County to consider. It is important to note, that in all scenarios, no employee salaries would be reduced.

- Bring to Minimum - an adjustment where employees who are below the minimum of their pay range are brought up to the minimum, with no further adjustments made.
- 30 Year Class Parity - an adjustment where employees are re-aligned along their salary range on the basis of how long they have been serving in their current classification at the County. This is done on a total 30-year basis, meaning employees with 30 or more years of experience in their current classification would be placed at maximum, whereas employees with 15 years would be placed at the midpoint of the range.
- 30 Year Class Parity, Capped at Midpoint - this is an adjustment similar in methodology to the full class parity, however, employee projected salaries would only be adjusted up to the midpoint of the range, as opposed to the entirety of the salary range.
- 30 Year Hybrid Parity - an adjustment where employees are re-aligned along their salary range on the basis of their "hybrid years." A hybrid year would give full credit to an employee for each year they have been serving in their current classification and one-half credit for the amount of time they have spent at the County in any other classification. This is done on a total 30-year basis, meaning employees with 30 or more hybrid years of experience would be placed at their grade maximum, whereas employees with 15 years would be placed at the midpoint of the range.
- 30 Year Hybrid Parity, Capped at Midpoint - this is an adjustment similar in methodology to the full hyprid parity, however, employee projected salaries would only be adjusted up to the midpoint of the range, as opposed to the entirety of the salary range.
- Range Placement - an adjustment where employees maintain their same progression within the pay range that they have achieved currently, into their new range. For
example, if an employee is currently 50 percent through their existing range, they would be placed at 50 percent through the new salary range.
- Range Placement, Capped at Midpoint - this is an adjustment similar in methodology to the full range placement, however, employee projected salaries would only be adjusted up to the midpoint of the range, as opposed to the entirety of the salary range.

While each of these options has its own pros and cons, Evergreen recommends the County select the Hybrid Parity - Capped at Midpoint implementation option. This methodology strikes a balance between giving employees credit for their time at the County while also ensuring that the time spent in an employees current classification is given the most weight. The cap on adjustments at the midpoint of the range ensures that the County's money is going to the employees who are likely furthest behind market - those employees who have not yet reached the midpoint of their pay range.

The third step is to make a determination on how many years are needed in order to fully fund and implement the changes. If the Hybrid Parity - Capped at Midpoint approach is selected and implemented in a single year it will cost the County $\$ 22,347,712$. That price tag would be difficult for any organization to handle in a single year, so Evergreen has developed plans to spread the increases across a few years. Multiple options were discussed, including an option that would have adjusted different County departments in different years based on how far behind market each department was. However, Evergreen recommends the option to spread all employee increases over the course of three years. With this implemenation plan, each employee who would receive an increase from the Hybrid Parity - Capped at Midpoint plan would have that increase divided by three and paid out over the course of the next three years. Additional 3.0 percent increases have been built in for years two and three to ensure that the County stays market competitive while going through this multi-year implementation. For this plan, including the living wage and built in 3.0 percent increases, the cost to the County for year one would be $\$ 9,257,121.74$; year two would be $\$ 13,433,800.18$; year three would be $\$ 14,855,529.48$. That brings the total cost of implementation over three years to $\$ 37,546,451.40$. It is important to highlight that the difference in cost between the single year implementation plan and the mutli-year implementation plan consists mainly of an assumed 3.0 percent increase for anticipated market movement in years two and three of implementation.

### 5.3 SYSTEM ADMINISTRATION

Any organization's compensation and classification system will need periodic maintenance. The recommendations provided in this chapter were developed based on conditions at the time the study was conducted. Without proper upkeep of the system, the potential for recruitment and retention issues may increase as the compensation and classification system becomes dated and less competitive.

RECOMMENDATION 6: Continue to conduct small-scale salary surveys as needed to assess the market competitiveness of hard-to-fill classifications and/or classifications with retention issues and make adjustments to pay range assignments if necessary.

While it is unlikely that the pay plan as a whole will need to be adjusted for several years, a small number of classifications' pay grades may need to be reassigned more frequently. If one or more classifications are exhibiting high turnover or are having difficulty with recruitment, the County should collect salary range data from peer organizations to determine whether an adjustment is needed for the pay grade of the classification(s).

## RECOMMENDATION 7: Conduct a comprehensive classification and compensation study every five to ten years.

While small-scale salary surveys can improve the market position of specific classifications, it is recommended that a full classification and compensation study be conducted every five to ten years to preserve both internal and external equity for the County. Changes to classification and compensation do occur, and while the increments of change may seem minor, they can compound over time. A failure to react to these changes quickly has the potential to place the County in a poor position for recruiting and retaining quality employees.

While the previous recommendation is intended to maintain the competitiveness over time of the classification and compensation structure as a whole, it is also necessary to establish procedures for determining equitable pay practices for individual employees.

In addition to overall structural recommendations, Evergreen will be providing the County with further maintenance recommendations affecting the following policy areas:

- Hiring/Initial salary placement
- Promotions
- Demotions
- Transfers
- Salary and range movement

Once the County has selected a method of implementation, Evergreen will provide recommendations under separate cover on how the County can modify or adopt new policies to ensure each of these functions align appropriately with its selected method of implementing the recommended structure.

### 5.4 SUMMARY

The County should be commended not only for its desire and commitment to provide competitive and fair compensation for its employees, but for its efforts to ensure all employees within the organization earn a living wage within the County. The recommendations in this chapter provide the County with the tools to adjust and maintain its pay plan for years to come. While the upkeep of this system requires concrete efforts, the County has shown that is more than capable of doing so in recent years and will be able to do so in the future.
